

WHAT IS THE S-CAPEPOD?

S-CAPEPOD helps evacuate bedridden people in emergencies. When placed between the patient's mattress and the frame of the bed, it can quickly and easily envelope the patient and mattress.

The rescue services only have to pull the flaps over the patient and mattress and fix them with a strong hook and loop system. This wraps the patient in fire-resistant material, acting like a protective cocoon.

One handgrip on the S-CAPEPOD enables them to then move the patient to safety. So the patient on the mattress can quickly be evacuated from the danger zone.

"According to independent research by the University of Ghent, Belgium, the S-CAPEPOD is by far the fastest and easiest evacuation sheet"

Interested? Do not hesitate to contact us, our staff is eager to help you!

- ✓ Proven to be the fastest evacuation sheet to evacuate bedridden people
- ✓ Extremely easy to use – one person operation
- ✓ Does not cause pressure points under the mattress
- ✓ The S-CAPEPOD is permeable, breathable, washable, supple and slippery
- ✓ Does not obstruct staircases
- ✓ Easily managed on all types of stairs
