

EVACU B™

Baby Evacuation Track System.

The Evacu B is a revolutionary track chair system, for simple, safe, secure evacuation of new-borns and infants from special care baby units (SCBU), in the event of fire or similar emergency.

Features:

- Quick and easy deployment for immediate use.
- Enables one carer to safely evacuate up to six babies.
- Specially designed track system enables the chair to grip the stair and descend with no bouncing.
- Front castors allow the chair to manoeuvre easily on stair landings.
- Automatic braking system will stop and hold a fully loaded Evacu-B on the stairs.
- Six individual pockets with tear way walls.
- Medical grade hypoallergenic head rests.
- Two securing cross straps.
- O2 cradle for Oxygen cylinder.
- Drain holes under pockets for easy cleaning.
- Wall mountable.
- Comes complete with wall bracket, dust cover and instructions
