

S-CAPEPLUS Evacuation Mattress – Youth Model

Designed for primary schools, children hospitals and people with dwarfism

Protecting people. Saving lives.

For the safe evacuation
of young children and shorter individuals.

Children with reduced mobility are not able to escape independently during an emergency evacuation. The S-CAPEPLUS Evacuation Mattress was redesigned to bring these children and shorter individuals to a safe area.

Important features:

No maintenance contract

Anti-bacterial properties

Ergonomic design

Little training required

Tested by children

The S-CAPEPLUS was tested by children from a primary school in Arnhem, The Netherlands. Because of the innovative and easy-to-use design, children can use the evacuation system as well.

Only a short instruction is needed and children can bring each other to a safety zone. Also when they need to evacuate via flight of stairs. Watch the video for more information.

A fire retardant Wall Cover for extra protection

The Wall Cover can be mounted to a wall and highlights the location of the evacuation mattress.
The Wall Cover is fire retardant and complies with DIN 4102-1 Class B1 & B2.

Also for people with dwarfism

Some people with dwarfism may need to use crutches, a scooter, or a wheelchair to get around.
When an emergency occurs, these shorter individuals will need assistance on their way out.
Leaving someone behind is not an option.

The Youth Model of the S-CAPEPLUS can be deployed in seconds and is ready for use in a few simple steps. It's an all-in-one rescue solution to prepare yourself and your organisation for a safe emergency evacuation.

Technology & details

Bacteria free

The fabric is treated with Sanitized®.

Weight

5 KG / 11 LBS – for easy transport

Payload

150 KG / 330 LBS – maximum payload

Size

The size of this evac mat is 175 x 60 cm / 69" x 23.5".

Storage

After use or after cleaning make sure it's dry before you store it away.

Conformité Européenne mark

Produced in alliance with European Safety Regulations.

Comfortable foam

SG30 foam ensures a safe evacuation without losing comfort.
