

MARK Grizzly

Rescue overall / EN 1497

MARK Grizzly is a Personal Protective Equipment (PPE) against falls from a height and has been designed for use in combination with descender / rescue devices certified according to EN 341. MARK Grizzly is certified according to EN 1497 and has been tested by TÜV Austria.

Who needs MARK Grizzly?

MARK Grizzly is easy to don and has been designed especially for amateur users and self-rescue / rescue purposes. Children, elderly and even unconscious people can be rescued with MARK Grizzly.

Details

- Overall: 65% polyester / 35% cotton
- Straps and loops: 100% polyester
- Sizes: S (kids) - XXXL
- Washable (washing machine, 40°, washing bag)
- Easy zip system

Combination with MARK products

MARK Grizzly should be used only in combination with PPE certified according to the respective EN norms. We recommend the use in combination with the self-rescue system incl. MARK Falcon descender device / MARK Boa tape sling.

MARK Grizzly = safe

In dangerous situations (e.g. in case of a fire) we must act quickly. But: Safety first! We therefore focused on three important aspects:

1. MARK Grizzly is easy to don

MARK Grizzly is easy to don. Just step into the overall, close the zip. And you're ready. You don't have to adjust the straps to individual sizes.

2. Triangular system

The leg loops are integrated into the overall in a triangular shape. The weight is thus distributed evenly over a large surface. A life-threatening suspension trauma can thus be prevented!

3. Slipping through? NOT POSSIBLE!

Smaller persons (e.g. children) can be rescued with a larger overall. Slipping through is NOT POSSIBLE!
